**FOR IMMEDIATE RELEASE**

## **VersaLogic Taps Schindele to Lead Supply Chain Efforts**

**Eugene, OR — Sept. 26, 2011** — VersaLogic Corp., an Oregon-based embedded computer company, has selected Michael Schindele as Director of Supply Chain. In this role, Schindele will be responsible for integrating materials management, capacity planning, and scheduling to further evolve VersaLogic's flexible, scalable manufacturing model.

Schindele brings to VersaLogic more than 30 years of experience managing contract manufacturing relationships across the globe for leading technology companies. From large corporations including Solectron, Flir Systems and RadiSys, to smaller companies such as InFocus and MicroVision, Schindele has a proven track record. Most recently Schindele spent the last six years serving RadiSys as the Senior Manager of Global Procurement and EMS where he implemented and managed numerous supply chain transfers and ramp readiness projects in the U.S., China, and Malaysia.

### **About VersaLogic Corporation**

A leading supplier of industrial computers since 1976, VersaLogic focuses on high-quality board-level products for embedded OEM applications. Its 5+ year production life guarantee and outstanding warranties demonstrate a commitment to service. Product platforms include EBX, PC/104™, PC/104-Plus, PCI-104, EPIC™, SUMIT™, and SPX™. For five consecutive years, VersaLogic has received the coveted "Platinum" level vendor rating based on independent user surveys by technology research firm VDC Research Group, Inc. VersaLogic is registered to the ISO 9001:2008 standard. For more information, visit [www.VersaLogic.com](http://www.VersaLogic.com).
