**FOR IMMEDIATE RELEASE**

## **VersaLogic Launches New Website**

Tualatin, OR — February 12, 2020 — VersaLogic Corp., a leading vendor of high quality embedded computers, announced the launch of its new website. The site features expanded product search tools, easy access to technical documentation, and features like chat to simplify communication.

“This new website is an extension of our focus on exceptional customer support” said Len Crane, President. “It is an excellent resource and a perfect complement to our US-based technical sales and support staff”.

### **COTS, MCOTS, and Custom Products**

The new site includes a parametric search which makes it easier to find embedded computer products such as the new “Grizzly” 16-core embedded server, or the “Harrier” featuring Intel®’s Apollo Lake Atom™ processor with error-correcting memory.

The website also includes on-line forms to simplify specifying modifications to an existing COTS product, or to define ground-up custom products for special applications.

### **News and Events**

New blog pages make it simple to find the latest information about products, events, and applications tips.

### **Support**

Whether it’s current or retired products, the new site makes it easy to find product specs, reference manuals, software resources, and contact information, or to engage in a real-time chat for quick answers.

To view the new VersaLogic website go to [www.versalogic.com](http://www.versalogic.com).

### **About VersaLogic Corporation**

VersaLogic delivers state-of-the-art embedded computers, coupled with expert technical support, for critical markets such as medical and defense. Featuring long-term availability, -40° to +85°C operation, MIL-STD-202 shock and vibration testing, and outstanding US-based support, VersaLogic products are ideal for critical applications that value ruggedness, reliability and long life. A 40+ year history of consistency has earned VersaLogic the reputation of being “the industry’s most trusted embedded computer company.” For more information, visit [VersaLogic.com](http://VersaLogic.com).
